

# Magnetic Mounting Pad

## Magnetic Mounting Pad

The magnet mounting pad is 120 lb pull force and dimensions length 2 in, width 2 in, and height 7/8 in. Also, it has a 1/4x28" UNF mounting connection.

1. Choose sensor mounting location (magnet should be mounted perpendicular to the shaft).
2. Clean the desired sensor location. Allow the magnet to have the best connection with the sensor.
3. Attach the magnet to the sensor.
4. Use caution when handling the magnet. DO NOT just plop it on. CAUTION: keep fingers off the magnet is strong.
